EDUCATION

B.Tech in Computer Science and Engineering **[2022 - 2026]**
PES University, Bangalore, India

Pre-University Course (PCMB) **[2020 – 2022]**
Government PU College, Shivamogga Percentage: 91.5%

EXPERIENCE

Tools Development Intern **Mar 2026 - Present**
Veoneer Safety Systems — Bengaluru

- Developed an Engineering Product validation Automation Tool in Python by integrating 3+ internal tools into a unified workflow, significantly reducing manual validation effort.
- Designed a modular and scalable application using the **Facade Design Pattern** and interface-based architecture, improving maintainability and extensibility.
- Built a user-friendly frontend using **MudBlazor** with a **SQL** backend for efficient storage, retrieval, and management of validation data.
- Automated Excel and JSON data processing using **OpenPyXL** and JSON parsing to generate validation reports and manage test configurations.
- Contributed to the design, execution, and validation of test cases for internal software applications, ensuring functional correctness and improving software quality.

Software Development Engineer Intern **Jan 2026 – Mar 2026**
White and Box Tech Product and Services — Bengaluru

- Designed and implemented REST APIs with clear request-response contracts and structured data flow
- Translated business requirements into scalable backend solutions with modular architecture
- Optimized backend performance considering latency, reliability, and real-world constraints
- Participated in system design discussions and contributed to backend architectural decisions

Software Engineer Intern (Virtual) **2 Months**
Maincraft Technologies

- Worked on REST APIs, HTTP protocols, and client-server architecture
- Debugged application issues and improved API reliability

Full Stack Development Intern (Virtual) **4 Months**

- Built full-stack applications with authentication, CRUD operations, and role-based access control

TECHNICAL SKILLS

Programming Languages: Java, Python
Frontend: HTML5, CSS3, JavaScript, React.js (Basics)
Backend: Node.js, Express.js, REST APIs , Python
Databases: MySQL, MongoDB
AI & LLM: Basics of LLMs, RAG, Prompt Engineering
Core CS: Data Structures & Algorithms, OOP, DBMS, OS, CN
Methodologies: Agile, SDLC, Automation Testing, API Design, System Design, Data Flow Architecture, Microservices (Basics)
Tools & AI : Git, GitHub, VS Code , Copilot , Claude code , Codex

PROJECTS

- **Bird Species Classification and Migration Prediction System**
  Designed an AI-based system combining CNN and LSTM for multimodal learning (image + audio).
  - Built end-to-end ML pipeline including preprocessing, feature extraction, and training.
  - Achieved 90%+ accuracy and improved forecasting by 20% over ARIMA baseline.
  - Designed data flow between classification and time-series prediction modules.

  - Evaluated trade-offs between statistical and deep learning models.

  Technologies: Python, TensorFlow, PyTorch, OpenCV, Librosa, LSTM

- **Real-Time Chat Application**
  - Built scalable backend APIs and integrated WebSocket-based real-time messaging.
  - Designed system architecture for handling concurrent users.

  Technologies: Node.js, Express.js, Socket.io, React.js, MongoDB

- **Zoo Management System**
  - Developed web application with structured database design and CRUD operations.
  - Implemented modular backend and dynamic UI rendering.

  Technologies: JavaScript, MySQL, HTML, CSS

ACHIEVEMENTS

- Head of Content, Kannada Koota Club – Led events and content strategy
- Academic Merit: 1st in SSLC, 2nd in PUC
- DAC Scholarship for academic excellence

CERTIFICATIONS

- HackerRank: Java (Basic), SQL (Intermediate), Problem Solving
