SRINIVASA K

+91 6362507433 shrinivaskshreeni@gmail.com linkedin.com/in/Srinivas-k Bangalore, India

EDUCATION

B.Tech in Computer Science and Engineering **[2022 - 2026]**
PES University, Bangalore, India

Pre-University Course (PCMB) **[2020 – 2022]**
Government PU College, Shivamogga 91.5%

EXPERIENCE

Software Engineer Intern **Mar 2026 – Present**
Veoneer Safety Systems — Bengaluru

- EPV Automation Tool: Developed a Python-based ECU sanity-validation application, reducing 40–60 min of manual testing to 10 min and significantly reducing manual effort.
- Designed a modular architecture using Wrapper, Factory, Facade Pub/Sub patterns, enabling the application to accept Excel, JSON, and Database inputs, interact with software APIs, and generate automated HTML validation reports through a standalone EXE application.
- Automated software application testing tasks by extending the framework for new test cases and validation scenarios, and integrated automated execution with Jenkins CI/CD pipelines for repeatable testing and reporting.

Software Development Engineer Intern **Nov 2025 – Mar 2026**
White and Box Tech Product and Services — Bengaluru

- Designed and implemented **REST APIs** with structured request-response contracts.
- Translated business requirements into maintainable backend components with reusable architecture.
- Analyzed backend execution flows with focus on latency, reliability, and scalability.

TECHNICAL SKILLS

Programming Languages: Java, Python, C#
Frontend: HTML5, CSS3, JavaScript, React.js
Backend: Node.js, Express.js, REST APIs, Python, .NET
Databases: MySQL, MongoDB, SQL
AI / Machine Learning: Machine Learning, Deep Learning, CNN, LSTM, TensorFlow, PyTorch , NumPy , Pandas , Mathplotlib
Core CS: Data Structures & Algorithms, OOP, DBMS, OS, CN
Software Engineering: API Design, System Design, SDLC, Agile, CI/CD, Jenkins
Tools: Git, GitHub, GitLab, Codebeamer, VS Code, Copilot, Claude Code

PROJECTS

Real-Time Chat Application - FullStack
Node.js, Express.js, Socket.io, React.js, MongoDB

- Engineered a real-time messaging platform using Socket.io/WebSockets for low-latency, event-driven communication.
- Developed RESTful APIs with Node.js/Express.js and MongoDB; built a responsive React.js interface with real-time synchronization.

Bird Species Classification & Migration Prediction System - AI
Python, TensorFlow, PyTorch, CNN, LSTM, OpenCV, Librosa

- Built a multimodal deep-learning pipeline combining CNN-based image classification and Librosa-based audio feature extraction (90%+ accuracy).
- Developed an LSTM time-series forecasting model for migration prediction, achieving 20% improvement over an ARIMA baseline.

Gmail Email Automation System - Automation
Python, Gmail API, Google OAuth 2.0, OpenPyXL, JSON, HTML

- Built a configurable email automation pipeline using the Gmail API and OAuth 2.0 to process Excel-based recipient data and send personalized emails with PDF attachments at scale.
- Designed modular components for template processing, attachment handling, delivery-status updates, exception handling, and execution logging.

Zoo Management System - FullStack
JavaScript, MySQL, HTML, CSS

- Developed a database-driven zoo management application with normalized MySQL schemas, optimized SQL queries, and complete CRUD operations.
- Implemented a modular, responsive frontend using JavaScript, HTML, and CSS with input validation and structured database workflows.

ACHIEVEMENTS & CERTIFICATIONS

Achievements: Head of Content, Kannada Koota Club (led events and content strategy); Academic Merit: 1st in SSLC, 2nd in PUC; DAC Scholarship for academic excellence.
